

# MOLYBDENUM

## GUARANTEED ANALYSIS

Molybdenum (Mo)..... 5.00%

Derived from Sodium Molybdate.  
Also contains 7.0% organic acid complex derived from Leonardite and/or composted manure.

## DIRECTIONS FOR USE

Method of Application	Suggested Rate per Acre	
	Field Crops	Tree and Vine Crops
Foliar broadcast spray .....	4 to 8 ounces .....	6 to 12 ounces
Foliar band spray .....	2 to 6 ounces .....	N/A
Sprinklers, solid set, pivot, linear, drag lines, etc. ....	4 to 8 ounces .....	6 to 12 ounces

## TIMING AND FREQUENCY OF APPLICATION

Application timing, intervals and rates may vary according to individual crop requirement, stage of development, available molybdenum levels in the soil, and overall nutritional status of the crop. HUMA GRO® MOLYBDENUM should be applied when practical experience, visual observation, or tissue or soil analysis indicate a need for molybdenum. MOLYBDENUM may be applied every 7-10 days as required to meet nutritional needs. Apply foliar sprays with sufficient water to ensure uniform coverage without running off leaf surfaces. Consult your local HUMA GRO® Representative or other agricultural specialist for specific crop recommendations.

**WARNING:** Application of this material in excess may result in forage crops containing levels of Molybdenum (Mo) which are toxic to ruminant animals.

This fertilizer is intended as a supplement to a regular fertilization program and will not, by itself, provide all the nutrients normally required by agricultural crops.

### Conditions of sale:

The information contained on this label is believed to be accurate and reliable. Buyer and user acknowledge and assume all liability resulting from the use of this material. Follow directions carefully. Timing, method of application, weather, crop conditions and other factors are beyond the control of the seller.

**CAUTION: KEEP OUT OF REACH OF CHILDREN**
